

Question & Response

AHCCCS RFP #YH09-0003, ALTCS Member Satisfaction Survey

RFP Section Title	Para. #	Page #	Question	Response
Survey Methodology and Survey instrument	2	7	Does AZ AHCCCS have a sample size in mind or is the sample size the responsibility of the contractor?	As stated in this RFP section, the vendor is expected to “...develop a sampling plan that will provide results at a reasonable confidence interval for each Program Contractor as well as statewide for each of the three targeted population groups. The vendor will also determine the need for over sampling in order to account for mortality and non-response of selected members.” This includes determination of appropriate sample size.
